1 Life

People always wonder what is life, why do we live, what is the meaning of our life this chapter aims answer those questions

1.1 Meaning of Life

Life essentially has no meaning,

Biologically on a higher level you need to pass on your genes on a lower level you live to maximize your happiness,

Socially you exist to further humanity and make sure that our species survive

Personally it's to achieve your own goals, if you don't have any then it's probably to enjoy life to the fullest. Life doesn't have any meaning, if we choose to live then it's our responsibility to find a meaning for your life.

1.2 Why should we live

If life doesn't have any meaning then why the fuck should we live right, well you don't have to but if you choose to end your life why not do whatever you want in life and end it, we all gonna die someday why not live our life to the fullest. Life is magical in its own right, In a universe that exists to maximize entropy there is life an order out of chaos.

1.3 How do we live

Well there is no one certain way to live, I just live to see another day, do what I can to survive for today, you should also think about long term sometimes but I generally don't bother.

1.4 How do I live with struggles

List down all of your problems in a notebook, and strive to do something to solve that problem, you can ignore the problem if it is impossible to solve as you always ignore what's not in your control

2 Death

Death is absense of being, you achieve peace after all your life's interesting paths

2.1 What happens after we die

Nothing, you won't have any thought process so you can't process anything, you won't have conciousness, it's like dreamless dream for eternity aka eternal peace.

2.2 Why don't we achieve eternal peace early

Well it's not recommended because, life is an one time opportunity to experience things experience anything, it's not like we get reincarnated or smth

3 Acceptance

One who accepts life and death, accepts peace. To accept life is to accept everyday life's struggle and to accept death is to accept fear, To accept both is to accept peace.
